ABOUT ME

Passionate about continuous improvement, data analysis, and process optimization, with a strong focus on efficiency and innovation. I aim to develop in a dynamic environment where I can apply my knowledge from a fresh perspective, combining analytical thinking, creativity, and a solid foundation in industrial engineering to create meaningful impact.

EDUCATION

Campoalto School, Paraguay | 2006-2020

High School Graduate

Universidad Politécnica Taiwán - Paraguay (UPTP) | 2023-2024

Industrial Engineering

National Taiwan University of Science and Technology (Exchange Student) | 2025-2026

Industrial Engineering

Academic Average: 3.6

WORK EXPERIENCE

Stewart Entrance Course | 2023 - Present

Precalculus and Multi Subject Tutor – Preparatory Course & Private Students

Precalculus instructor at the Stewart Preparatory Course, an induction program for the entrance exam to UPTP. Currently continuing to teach virtually. Privately, I also teach mathematics, English, and Spanish to Taiwanese youth and to students in Paraguay.

ACHIEVEMENTS AND ACTIVITIES

Nagoya, Japan | 2026

Accepted Paper – International Congress on Engineering and Information (ICEAI)

Research paper accepted and presented at the ICEAI 2026 conference, focusing on Simulation-Based Optimization of Ergonomics and Human-Robot Collaboration in a Paraguayan Powdered Milk Production Line Using Digital Twins.

Wichita State University | 2025

Optimization for Engineers Online Course

Accepted into an online Optimization course offered by Wichita State University, focused on improving decision-making and process efficiency through analytical and mathematical techniques.

Asunción, Paraguay / Taipei, Taiwan | 2026

Capstone Research Project – Taiwan-Paraguay Polytechnic University (UPTP) & National Taiwan University of Science and Technology (NTUST)

Simulation-based analysis of collaborative robotics integration in a foam mattress manufacturing facility using FlexSim digital twin modeling. Quantified ergonomic risk across nine workstations via RULA and the Revised NIOSH Lifting Equation; evaluated financial feasibility of automation (ASRS, robotic arms, AGV, conveyors) through a 10-year discounted cash flow model under three cost scenarios.

National University of Asunción (UNA) - Instructor: Ing. Marcelo Romero Ocariz | 2026

Completed Course – Introduction to SAP S/4HANA

Focused on enterprise resource planning (ERP) fundamentals, business process integration, and core functionalities of SAP S/4HANA within industrial and organizational environments.

National University of Asunción (UNA) | 2026

Completed Course – Introduction to SQL

Focused on database fundamentals, SQL, key commands (DDL, DQL, DML), and practical applications in data analysis.

Universidad Politécnica Taiwán - Paraguay (UPTP) | 2023 - 2024

Active Member of the UPTP Student Council

Coordinating academic and social activities, organizing institutional events, and serving as a student spokesperson to promote communication between students and the university administration.

Entrepreneurship Project | 2024

Cow Market Web Platform

Co-created Cow Market with three teammates, a web-based cattle auction platform that generated revenue through transaction commissions. Contributed to the platform's design, auction logic, and payment processing flow, providing an innovative digital solution for livestock trade.

Objects Oriented Programming and Data Structure | 2024

Software Development Projects

In Object-Oriented Programming (OOP), developed a dynamic library management system for students and staff, using C and C++. In Data Structures, built the Find Your Route Partner app to connect students with private transportation, reducing travel time and costs, using Python.

Technical Drawing Course | 2023

Sustainable Design Project

Third place in a university competition for designing an eco-friendly mosquito net using renewable materials, developed in collaboration with Electromechanical Engineering students.

School Science Fair | 2015

Winner

Designed and built a battery-powered mini solenoid motor using recycled materials, winning first place in multiple school science fairs for its innovation and sustainability.

Honor Roll | Colegio Campoalto | 2020

Academic Recognition

Recognized as part of the honor roll for maintaining high academic performance, demonstrating discipline, responsibility, and excellence throughout my school years.
Techo Paraguay | 2019-2024

Casa Albino Luis and San Rafael Church | 2016-2017

Volunteer

Assisting in community service activities, organizing donation drives, and supporting social outreach programs for families in need.

Volunteer

Volunteer at TECHO Paraguay, participating in community development projects, assisting in the construction of emergency housing, and supporting social initiatives to improve living conditions in vulnerable communities.

South American Games ODESUR | 2022

Volunteer

Assisting in event coordination, athlete support, and logistics management to ensure the successful development of the competitions.

SKILLS

- Soft Skills: Proactivity, Patience and Resilience, Result-Oriented Mindset, Teamwork, Leadership, Effective Communication, Problem Solving, Time Management, Adaptability
- Technical Skills:
 - Simulation & Modeling Software: Flexsim
 - Programming & Data Analysis: Python, C, C++, Java, HTML, CSS, SQL, MATLAB
 - Financial & Analytical Tools: Advanced Google Sheets, Excel, Power BI, Tableau
 - Project & Process Management: Lean Six Sigma basics, Process Mapping, KPI Tracking, Workflow Optimization

LANGUAGES

- Spanish (native language from Paraguay)
- Guaraní (native language from Paraguay)
- English (Advanced)
- Chinese (basic)
